Manufactured Housing/Old Work
Single Gang Boxes
with “W” Wing Brackets

Part Numbers: 9331-EWK, 9363-EWK, 9368-EWK

The Allied Moulded 9331-EWK, 9363-EWK* and 9368-EWK are mounted identically.

1. Cut an opening in the wall to comply with NEC 314-20. Allied Moulded Products’ template #1TP is designed to provide the guide for such a hole and allows 1/16” clearance around the outside of the box.

2. Insert box into opening. Tighten wing screws to secure box to wall substrate. UL® has tested these boxes in 3/8” thick plywood which is the substrate used for their standard test. The strength of the substrate must be equal to 3/8” thick plywood.

   *Allied Moulded Products has had the 9363-EW style box tested in wall assemblies that use 5/16” thick gypsum board covering. This test was conducted by a testing laboratory that has been evaluated by BOCA as an independent testing and inspection agency for manufactured buildings. This report is available upon request.

3. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with speed “K” klamps before installing the box in the wall assembly.
