MEDIA RELEASE

Floor Box Assemblies with Adjustable Box Now Available From Allied Moulded

BRYAN, Ohio, October 14, 2016 – Allied Moulded Products, Inc., is launching a new addition to its comprehensive line of floor box products. The latest innovation is a single-gang assembly featuring an adjustable box, similar in design to our SLIDERBOX® adjustable boxes. These new products are an addition to the popular lineup of residential floor boxes launched in 2011. Designed for use in wood floor construction, these assemblies are compatible with multiple floor substrate materials, including ceramic, hardwood, laminate or carpet.

These new floor box assemblies will install on a wood floor joist with the potential for up to 2” of flooring substrate and they will adjust up or down with a slider plate design making it easier for flooring installers to adjoin to the box exterior in a flush and square position.

Each floor box is UL®-listed, and features tamper resistant devices, extra deep wiring capacity and cover gaskets that provide scrub watertight seal.

For more information about Allied Moulded’s residential floor box products, call 419-636-4217 or visit www.alliedmoulded.com/go/floorbox.

About Allied Moulded Products, Inc.

Allied Moulded Products, Inc., established in 1958, is a leader in the production of fiberglass reinforced and polycarbonate, nonmetallic electrical boxes and enclosures, for use in residential and industrial applications globally. The Bryan, Ohio-based manufacturer today is perfecting material and design formulations that result in products with increased strength, reduced weight, corrosion resistance, non-conductivity, UV resistance and ease of installation.
