Allied Moulded Products, Inc. offers HMI Cover Kits and Inspection Windows for Electrical Enclosures

Premium enclosure accessories manufactured by the experts of nonmetallic electrical enclosures

BRYAN, OH, December 10, 2015 – Allied Moulded Products, Inc., an industry leader in nonmetallic electrical boxes and enclosures, is expanding its line of premium enclosure accessories with HMI cover kits and inspection windows.

The HMI cover kits are designed to provide protection for instruments or electronics requiring routine attention or detail. The cover kit features a strong and rigid design, mounting securely to the outside of any enclosure, and makes accessibility to electronic components easy. Available in two sizes, HMI cover kits are UL® recognized and maintain a NEMA 4X seal with the use of a Formed-In-Place (FIP) polyurethane gasket system, and is well-suited for outdoor applications. Multiple cover latching options are also available, including a hinge screw, tamper proof screw, and snap latch model. All are available in solid opaque or polycarbonate thermoplastic clear covers.

“We are really excited about offering HMI Cover Kits to the market,” explains Robert Knecht, Marketing & Product Manager. “This is a product that is truly application driven. It reduces the risk of arc flash by eliminating the need to fully open an enclosure to view electronics or perform maintenance on a system.”

Similarly, Allied Moulded’s new inspection window kits are designed to provide visibility and easy viewing access to equipment and components installed in an enclosure, while maintaining ratings up through NEMA Type 4X. The window kit features a strong and rigid design, securely mounting to the outside of most...
enclosure designs. The window kit is conveniently sized at 6" x 6" to allow for sufficient viewing space in any required application.

Allied Moulded continues to be a leading manufacturer of nonmetallic electrical enclosures and a "one-stop resource" where fiberglass and polycarbonate products can co-exist depending on the specific application characteristics and chemical compatibility requirements.
