## MEDIA RELEASE

### **Allied Moulded Products, Inc. expands POLYLINE® AMP Series product offering**

*Polycarbonate enclosures manufactured by the experts of nonmetallic electrical enclosures*

BRYAN, Ohio, September 9, 2019 – Allied Moulded Products, Inc., an industry leader in nonmetallic electrical boxes and enclosures, is expanding its POLYLINE® AMP Series of polycarbonate enclosures.

The POLYLINE AMP Series of injection-molded products are made from polycarbonate thermoplastic and have been available for several years. Allied Moulded is expanding the series with a new size: 4" x 4" x 3" (base part number AMP443). This new size is being offered with the same features of the existing POLYLINE product family.

“Our POLYLINE series of polycarbonate enclosures is growing in popularity,” explains Terry Hernandez, National Sales Manager. “We’re excited to offer more sizes to fit the needs our end users; and these are great-looking enclosures for both indoor and outdoor applications.”

POLYLINE comes standard with patented, multi-mounting capability, including an out-of-the-box mounting flange or adjustable mounting feet that adapt to various mounting configurations. The series features metallic or nonmetallic latches and molded-in latch keepers and mounting bosses, as well as a tongue-and-groove seal joint between cover and base. A clear polycarbonate cover option is also available for instrumental applications where critical electronic equipment must be visible and protected from the elements.

Allied Moulded continues to be a leading manufacturer of nonmetallic electrical enclosures and a “one-stop resource” where fiberglass and polycarbonate products can co-exist depending on the specific application characteristics and chemical compatibility requirements.
