## MEDIA RELEASE

### **Allied Moulded Products, Inc. expands POLYLINE® AMP Series product offering**

Polycarbonate enclosures manufactured by the experts of nonmetallic electrical enclosures

BRYAN, Ohio, March 30, 2016 – Allied Moulded Products, Inc., an industry leader in nonmetallic electrical boxes and enclosures, is expanding its POLYLINE® AMP Series of polycarbonate enclosures.

The POLYLINE AMP Series of injection-molded products are made from polycarbonate thermoplastic, and have been available for several years. Allied Moulded is expanding the series with two new sizes: 10" x 8" x 2" and 12" x 10" x 4" (base part numbers AMP1082 and AMP1204, respectively). These new, shallow-depth sizes are being offered with the same features of the existing POLYLINE product family.

“These new, shallow-depth sizes are being added to our product offering,” explains Robert Knecht, Marketing & Product Manager, “to better meet the needs of various industries using more compact electronics. The robust design and sleek look make them perfect for indoor or outdoor applications in commercial or industrial settings.”

POLYLINE comes standard with patented, multi-mounting capability, including an out-of-the-box mounting flange or adjustable mounting feet that adapt to various mounting configurations. The series features metallic or nonmetallic lathes (AMP1204 only) and molded-in latch keepers and mounting bosses, as well as a tongue-and-groove seal joint between cover and base. A clear polycarbonate cover option is also available for instrumental applications where critical electronic equipment must be visible and protected from the elements.

Allied Moulded continues to be a leading manufacturer of nonmetallic electrical enclosures and a “one-stop resource” where fiberglass and polycarbonate products can co-exist depending on the specific application characteristics and chemical compatibility requirements.
