Enclosure Hole Plug Assemblies

AMHS Series

ULTRAPLUG® hole plugs are designed to plug and seal unused holes in metallic, aluminum and nonmetallic enclosures. They fit a wide range of sizes, so there is no need for restrictive hole-centering spacers. The self-centering, anti-rotational design insures quick and simple one-person nut assembly and no tools are required for tightening and maintaining a NEMA 4X enclosure rating. To learn more, visit alliedmoulded.com.

HOLE PLUG FEATURES

- Innovative plug “fins” have self-centering, anti-rotational design for fast and easy one-person plug assembly and no-tools tightening
- plugs fit a wide range of hole sizes without the use of restrictive hole-centering spacers
- Patented design: US Pat. No. 9,045,932
- UL® listed and recognized component for use with CSA® listed enclosure products
- EN / IEC 60204-1 and 60529 Type IP66
- Molded material of construction for a wide range of chemical compatible applications (polycarbonate with neoprene/EPDM gasket)
- Assembly designed to maintain applicable NEMA/UL/CSA enclosure ratings
  "Note: For use on flat smooth surfaces of Type 1, 3R, 4, 4X and 12 enclosures"
- Designed for use with wall thicknesses from 16 gauge through ¼"
- Designed for use with all metallic and nonmetallic enclosure materials
- Low profile interior nut and exterior plug saves valuable panel space
- Capable of sealing unused holes ranging in size from ½" to 4-¾"

SIMPLE INSTALLATION

1. Push and twist the plug into the hole, engaging the fins.
2. Screw in and tighten the nut until the plug bottoms out on the substrate. Hand tighten only.

Hole Plug Assemblies

Allied Moulded’s ULTRAPLUG® hole plug assemblies are for sealing unused holes in NEMA 4X enclosures made of many different substrates. They are available in two different colors to match your specific enclosure. The patented design features one-person assembly for quick and easy installation.

Note: For use on flat smooth surface of NEMA Types 1, 3, 3R, 4, 4X and 12 enclosures.

Polycarbonate (PC) can be used as a substitute for carbon steel plug applications plus many stainless steel and other nonmetallic plug applications. Please check industry standard corrosion guides for additional application assistance.
